

The finishing touches can make all the difference

Premium kitchen appliances from InSinkErator®

Add a point of difference

Add value

Add the wow factor

An easy way to make a good kitchen great

InSinkErator's premium kitchen appliances not only radiate convenience, but they make a bold statement about the modern lifestyle your customers can look forward to enjoying.

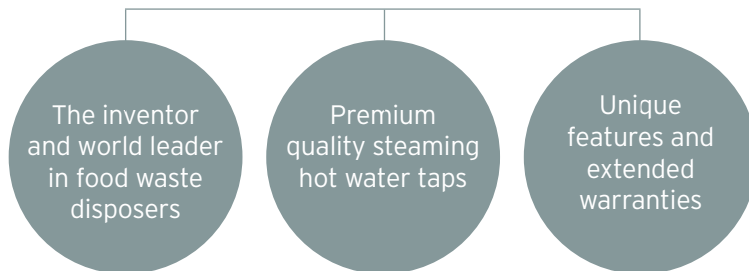

They're an immediate talking point

When you're hosting a viewing, an InSinkErator® steaming hot water tap is a great talking point - especially if you're making the coffee!

Convenient technology to reduce the carbon footprint of new homes

Hidden under the sink a food waste disposer has practical benefits and can get rid of food waste instantly, hygienically and in a sustainable manner, eliminating any unpleasant odours in the kitchen.

Work with a world leader

In line with current trends

According to a recent Houzz UK kitchen trends survey* , **24% of respondents installed an instant hot water tap in their kitchen** in the last 12 months or planned to install an instant hot water tap in their kitchen in the next three months.

Not only will this streamline the worktop by reducing the clutter of a kettle, an instant hot water tap that dispenses steaming hot water will also eliminate wasted energy that results from boiling more water than is necessary, time after time.

With recycling at the top of the Government's agenda, waste is a problem in every home.

According to WRAP, seven million tonnes of food and drink are wasted every year in the UK, amounting to approximately 20 per cent of all household waste and resulting in a huge strain on landfill sites. With more people than ever interested in planet friendly solutions our food waste disposers fit the bill by eliminating food waste from landfill sites. They're easy to install, quick, safe and far more hygienic than a kitchen bin.

InSinkErator® steaming hot water taps and food waste disposers make a huge difference to consumer lifestyles.

DESIGNED & MADE IN ITALY

The award winning InSinkErator® 4N1 Touch

Designed to meet the increased demand for bottled water, the InSinkErator® 4N1 Touch brings convenience and style to any kitchen, eliminating both the kettle and the filter jug, whilst streamlining the kitchen work surface.

- Provides instant hot water at up to 99°C - the perfect temperature for hot drinks
- Delivers filtered cold water for 30 seconds at the touch of a button
- Dispenses regular hot and cold water - one tap does everything
- Available in three shapes and three on trend finishes
- Awarded an Archiproducts Design Award for its concept, innovation, technical quality and functionality
- Can help reduce water wastage in the home and save on the cost of utility bills as you only heat the water you use

Creating a sustainable lifestyle in the village in the sky

The Maine Tower, a focal point of the Harbour Central development, sky level 'vertical village' overlooking Canary Wharf, comprises of 297 exquisite apartments situated over 42 floors. Each apartment features an InSinkErator® 3N1 L Shape instant hot water tap finished in Brushed Steel.

“

One of our aims at Galliard Homes is to create functional and sustainable properties and the 3N1 steaming hot water tap from InSinkErator® ticks all the boxes. The 3N1 offers convenience to the end user, streamlines the kitchen by removing the need for a kettle and, most importantly to us as the developer, has been approved by the Water Regulations Advisory Scheme.

”

David Galman. Sales Director,
Galliard Homes Limited

Making a difference at Hayfield Green

This prestige development in rural Oxfordshire offers customers the opportunity to 'come and see the difference at Hayfield'. Renowned for offering homebuyers that little bit more than standard, working closely with InSinkErator® stockist, Manor Interiors, Hayfield Homes selected the 4N1 Touch instant hot water tap.

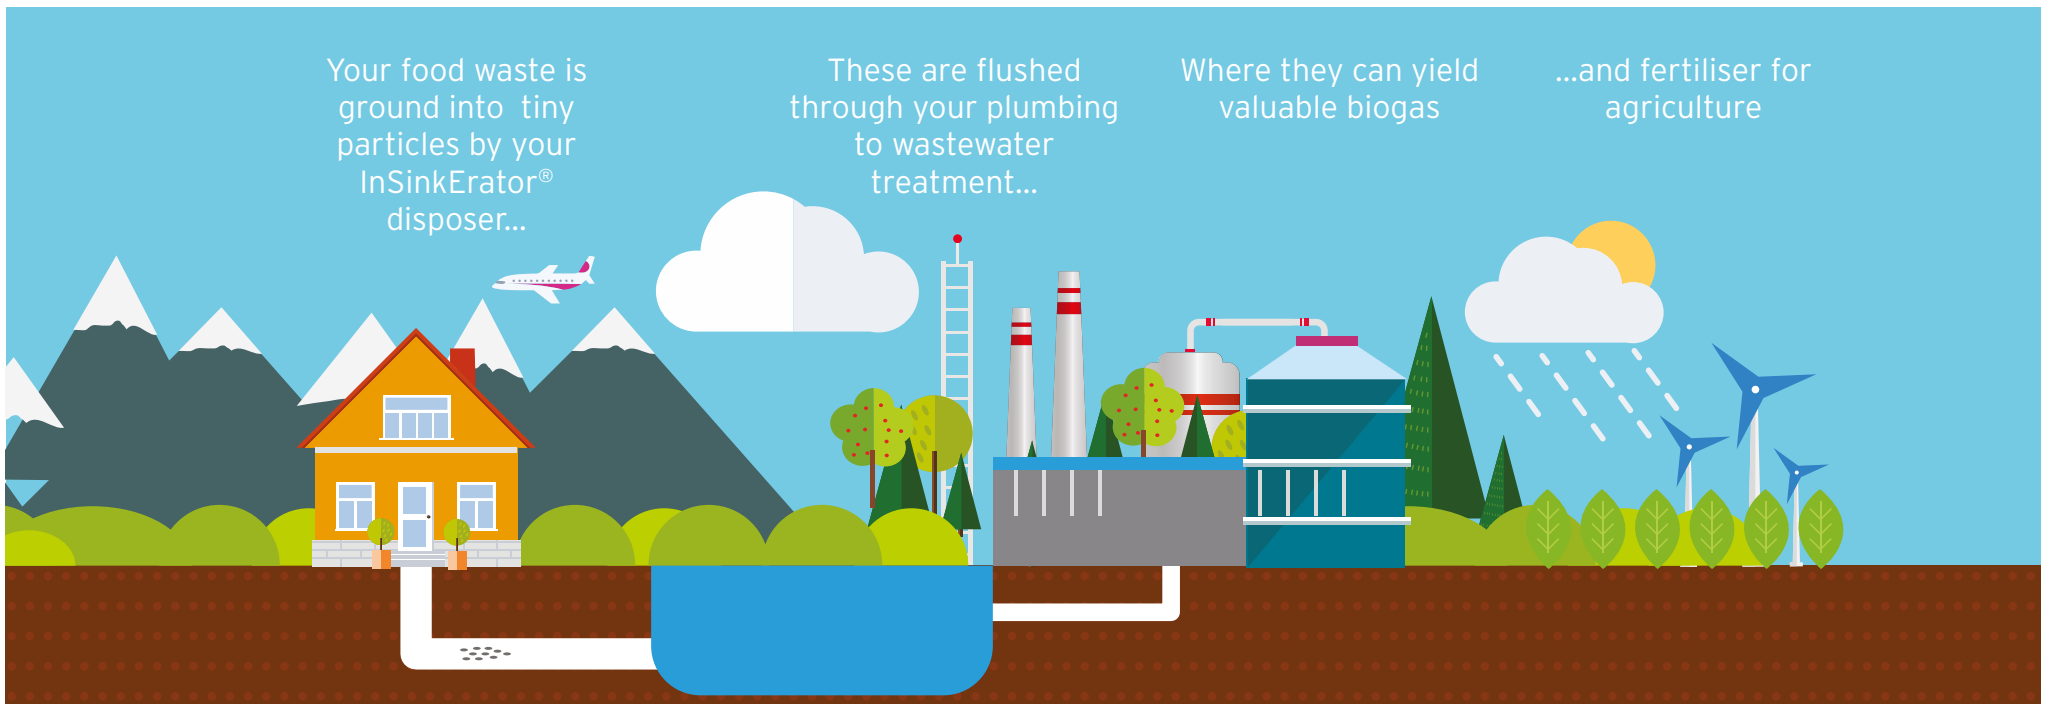

“We have chosen to install InSinkErator® 4N1 Touch taps into the larger homes at our most prestigious developments to appeal to aspirational purchasers. The instant hot water function is a practical and stylish addition to our bespoke kitchens, which have been designed with a comprehensive range of built-in appliances.”

Kelly Sharman.
Sales & Marketing Director, Hayfield

Increase your green credentials by adding sustainable food waste disposal

InSinkErator® is an active campaigner in the prevention and sustainable disposal of food waste and advises composting wherever possible. Where this option is not practical, an InSinkErator® food waste disposer is the responsible alternative, diverting food waste from landfill where it would contribute to the harmful methane released into the environment.

The top-of-the-range Evolution 250

Made from premium materials, the Evolution 250 is both powerful and quiet to operate. It features a compact design and is capable of grinding most food types including stringy and fibrous foods in seconds.

- Triple stage stainless steel grinding system
- Power booster circuit with micro-processor increases torque to tackle the most difficult to grind foods
- Evolution-Quiet technology
- Eight-year parts and labour guarantee

A range of food waste disposers to suit every household and lifestyle

People who experience the convenience and hygiene that an InSinkErator® food waste disposer brings to their life very often become advocates for this safe, efficient and sustainable means of dealing with an unpleasant kitchen chore.

The Good Housekeeping Institute endorsed M Series 66

This high performance appliance has received the sought-after Good Housekeeping Institute (GHI) approved endorsement highlighting that the food waste disposer possesses tremendous functionality and versatility.

- Single stage stainless steel grinding system
- Quiet sound reduction technology
- Four-year parts and labour warranty

The affordable M Series 46 with air switch

Designed specifically for smaller households this great value model delivers a practical solution for even the tightest budget whilst still offering the convenience of an air switch and the same high quality build as the rest of the range.

- Single stage stainless steel grinding system
- Sound reduction technology
- Two-year parts and labour warranty

Instant Hot Water Taps

Choose from a wide range of styles and finishes

WRAS approval

One essential accreditation for housebuilders is that all InSinkErator® 3N1 and 4N1 Touch instant hot water taps, as well as the NeoTank and filter unit, have gained approval from the Water Regulations Advisory Scheme (WRAS), demonstrating our commitment to compliance and safety.

What customers say about our products

Steaming Hot Water Taps

"We absolutely love our tap. It's easy to use, safe and stylish. It provides plenty of boiling water for a large amount of uses including hot drinks, cooking and rinsing cooked food such as pasta or rice."

Mrs. Nicola White

"Wish we had had one years ago. No kettles to boil, heats knives to cut frozen food and ice cream. Best thing we ever purchased!"

Mr. Sheppard

"Brilliant tap. Saves so much time and electricity!"

Mrs. Julie

"A real 21st century device. Wouldn't be without one now."

Mr. Neil Mowbray

Food Waste Disposers

"This is one of the best gadgets! I've purchased, for my new kitchen, an InSinkErator food waste disposer and it's excellent. Peels the spuds, peels apples, unwanted food, leftovers - all straight down the sink. It's fabulous!"

Mr. Tony

"I'd go mental without my InSinkErator food waste disposer. As far as I'm concerned, it's a win-win situation so I love it."

Mrs. Helen

"The Evolution 200 is powerful enough to chop up small bones with ease and is extremely quiet in use, far less noisy than my old machine. Every kitchen should have one, no more smelly food caddies!"

Mrs. S. Millbank
